Ruby/Ruby On Rails, JavaScript/CoffeeScript Full-Stack developer. Location: Kyiv, Ukraine skype: roman.rott Contact phone number: +380-50-832-72-34 roman@rrott.com

SUMMARY OF QUALIFICATION:

Front-end/Back-end developer with 10+ years of IT experience and 5+ years experience dedicated to web-development and security auditing of web applications. Over the 9 years I was working on a various positions and different departments in a big Cloud and Shared Hosting company: 5 of them were in Tech Support(Customer Relation) department and 4 in IT as a Ruby/Rails developer. Now I am a Software Engineer at Sphere Inc. My previous experience includes:

- Work with the project managers to plan, estimate and allocate resources to projects and tasks. Supervising the whole projects' life cycles, starting from initial proposal and requirements gathering finishing execution and release planning.
- Work as a Team Lead within more than 5 projects leading both local and remote team members. Mentoring and supervising junior and middle ruby/js developers.
- Collaborating with remote team members from Romania, India and the USA.
- Work with legacy code, refactoring and optimizing web-applications.
- Security researching and legal penetration testing.

PERSONAL INFORMATION:

LinkedIn: https://ua.linkedin.com/in/rrott GitHub: https://github.com/rrott Portfolio: https://rrott.com

SKILLS:

These are only a few technologies that I use on a daily basis while there are a lot of interesting libraries in the Ruby and JS worlds that I used for self-development:

Ruby, JavaScript/ES6/CoffeeScriptRuby on Rails, Sinatra/Padrino- as main languages.- as Ruby frameworks.

React/Redux - as JS frameworks for creating SPA

Rspec/Capybara, Jasmine - as test frameworks.

Familiar with: ECMAScript 6, JS, JQuery, Node.js, Trailblazer, Grape, Rabl, Haml, SASS, HTML5, Redis, Docker, Chef, Capistrano, Bash, Burp, etc.

EDUCATION

Zaporizhzhya National University of Ukraine

Specialty: Economic Cybernetics;

Degree: Mathematician, Economist. Second cycle of higher education.

Ruby/Ruby On Rails, JavaScript/CoffeeScript Full-Stack developer. Location: Kyiv, Ukraine skype: roman.rott Contact phone number: +380-50-832-72-34 roman@rrott.com

SPECIAL KNOWLEDGES

Web Application Security Researcher:

- My interest in ethical hacking has resulted in dozens of found and reported security issues in such services as: rubygems.org, ZeroMail, tagged.com, etc
- I took part in a CTF(Capture The Flag security game) as a Game Master and designed several vulnerable web applications for **UISGCon** #10, #11, #12 (2014-2016) - Ukrainian InfoSec conference.
- Prepared CTF game for **«HackIT-2015»** the Cybersecurity Olympiad and International forum **«Cybersecurity: Ukraine and the world»**

Community development:

- Contributed to open source projects, e.g.: react-toolbox gitlab-ce phony site_prism.vcr
- Had a speech on the 11th Ruby Meditation meetup.
- Partnered with 4 other developers to plan and execute 3 Front-End Meetups and the very first <u>Hackathon in Zaporizhzhya</u> city.

Languages: English – upper-intermediate level. Ukrainian, Russian – native.

SUMMARY OF EXPERIENCE:

Detailed portfolio can be found at: https://rrott.com/portfolio/

Company:	Sphere Software Mar 2016 – Present		
Project:	Dabble, Chicago IL		
Project Description:	Dabble is an online community marketplace for people to discover, teach and host unique and affordable one-time classes. Was working mostly on UI parts of the app using JS and CoffeeScript. Worked on migrating from old SSO to a new one , refactored and removed legacy code, was working on optimizing and performance enhancement.		
Customer:	US company https://dabble.co/		
Project Role:	Front-end, Back-end developer		
Responsibilities:	 Updating UI, Applying new design. Implementing back-end entities and business logic. Refactoring legacy code 		
Project Team Size:	~ 5 team members

Tools & Technologies:	Ruby 1.9.7 and 2.1.3, CoffeeScript, Ruby on Rails 4.0, Sinatra, Backbone.js 1.1, Marionette.js, jQuery, Rspec 3.2, Capybara, Jasmine, VCR, site_prism.vcr, Capistrano, SASS, ROM, Guard, Node, Faye		
Project:	Ordering Wizard, Columbus OH		
Project Description:	Ordering wizard for Cloud product IxWebhosting.com. This project is ar Application that allows to pre-configur	n integrated Single Page	

without using external payment services.

Ruby/Ruby On Rails, JavaScript/CoffeeScript Full-Stack developer. Location: Kyiv, Ukraine skype: roman.rott Contact phone number: +380-50-832-72-34 roman@rrott.com

Customer: US Company http://www.ixwebhosting.com/

Project Role:

Full-Stack Developer.

Responsibilities:

- Creating UI that integrates SOAP API interface with control panel and CloudStack that uses JSON.
- Supporting released features, updating functionality as it was required by MVP and Agile methodologies.

Project Team Size:

3 developers and 2 QAs

Tools & Technologies:

Ruby 2.1.3, CoffeeScript, Sinatra, Backbone.js, jQuery, Ruby on Rails 4.0, Rspec 3.2, Capybara, Jasmine, VCR, site_prism.vcr, Capistrano, SASS, ROM

Project:

IxWebhosting.com + HostExcellence.com

Project Description:

Landing pages for IxWebhosting.com and HostExcellence.com, This project contains pop-ups and bunch of landing pages for current and pre-sales products that give the company an opportunity to sale a product using one-click purchase tool or Opt-In for a new project that is not yet released.

Customer:

US Company http://www.ixwebhosting.com/

Project Role:

Front-end Developer

Responsibilities:

- Integrating design with current API and billing system.
- writing code needed for One-Click purchase tool.

Project Team Size:

2 developers, 1 designer, 1 QA

Tools & Technologies:

Ruby 2.1.3, CoffeeScript, Ruby on Rails 4.0, jQuery, Rspec 3.2, Capybara, Jasmine, SASS, Faye, JSON

Company:

Independent or temporary projects, own projects.

Project:

Cybersecurity Olympiad «HackIT-2015»

Jan 2015 - Mar 2015

Project Description:

«SecureVPN» is a service created for the Cybersecurity Olympiad «HackIT-2015» with deep integration of fake payment service that allowed users to get paid VPN server and connect to any other servers in the network. Service was based on an open-source project with hooks for OpenVPN that I had to rewrite for game's needs. The whole infrastructure had 2 VPN servers located in Amsterdam and Singapore, billing system located in Toronto and payment system in Singapore. Back-end was rewritten to add flags and integrate the product with 3rd party payment systems.

Ruby/Ruby On Rails, JavaScript/CoffeeScript Full-Stack developer. Location: Kyiv, Ukraine Contact phone number: +380-50-832-72-34 roman@rrott.com skype: roman.rott

Customer: Ukrainian Non-Government Organisation «Ukrainian Information Security Group» **Project Role:** Full-Stack developer, Game-Master's assistant. Responsibilities: Adding and configuring VPN, SQL and web servers using

> Chef. Integrating fake payment system with the services,

adding vulnerabilities and fixing existent ones.

Project Team Size: 1 developer, 2 game masters, 2 security researchers.

Tools & Technologies: Ruby 2.1, Ruby on Rails 4.2, Chef

Project: UISGCon 11(2015) Oct 2015 - Dec 2015

Project Description: «FindMeGetMe» is a fake Dating website with an API for mobile application created for a CTF(Capture The Flag hacking game) organised for UISGCon 11(2015) - Ukrainian InfoSec conference held by Non-Government Organisation «Ukrainian Information Security Group» This Fake Dating website was created for security researchers and had no real users or profiles. It was created with a pre-defined vulnerabilities related to Redis and Sockets. I used a Free design and added vulnerable Rack application that gets photos

from Redis service using Sockets technology.

Customer: Ukrainian Non-Government Organisation «Ukrainian Information Security Group»

https://uisgcon.org/

Project Role: Full-Stack developer, second Game-Master

Responsibilities: Creating back-end integrating design

configuring and optimising web, Redis servers,

monitoring services and the application during the games.

Creating API for a mobile app.

Creating mobile app using React native.

Project Team Size: 1 developer, 2 game masters, 2 security researchers.

Tools & Technologies: Ruby 2.2, Sinatra, Redis, JavaScript, React Native 0.15

grunt-coffee-chain - grunt plugin **Project:**

Project Description: A grunt plugin inspired by Sprockets to compile CoffeeScripts that has sprockets-style comments to indicate dependencies. It allows web developers in their CoffeeScript files to write Sprockets-style

comments to indicate dependencies. This ruby gem is written in CoffeeScript but it compiles itself to JavaScript using the previous version of itself.

Customer: Open Source Community

Project Role: JavaScript developer

Responsibilities:

Full-stack developer
Support of the OSS

Tools & Technologies: CoffeeScript, JavaScript, Node.js 0.10.15, Grunt 0.4, Sprockets,

Snockets

Project: AsanaGodContact - ruby gem

Project Description: A gem for sending notifications to Asana using god.rb tool. God.rb is

an easy to configure, easy to extend monitoring framework written in Ruby. http://godrb.com/ Asana is a web and mobile application designed to help teams track their work. This OSS ruby gem allows to send notifications to asana in case God.rb raises an issue with

your ruby app.

Customer: Open Source Community

Project Role: Ruby developer

Responsibilities: • Full-stack developer

Support of the OSS

Tools & Technologies: Ruby 2.1, Mocha, Minitest
