Roman Rott

Ruby/Ruby On Rails, JavaScript/CoffeeScript Full-Stack developer.

skype: roman.rott • Contact phone number: +380-50-832-72-34 • roman.rott@gmail.com

SUMMARY OF QUALIFICATION:

Front-end/Back-end developer with 10+ years of IT experience and 3.5 years experience dedicated to web-development and security auditing of web applications. Tend to use Ruby and CoffeeScript to follow TDD and OOP best practices.

PERSONAL INFORMATION:

LinkedIn: https://ua.linkedin.com/in/rrott
GitHub: https://github.com/rrott
Homepage/Portfolio: https://rott.org.ua

SKILLS:

These are only a few technologies that I use on a daily basis while there are a lot of interesting libraries in the Ruby and JS worlds that I used for self-development:

Ruby, JavaScript/CoffeeScript   - as main languages.
Rails, Sinatra/Padrino   - as Ruby frameworks.
Backbone/Marionette   - as JS frameworks for creating SPA
Rspec/Capybara, Jasmine   - as test frameworks.

Familiar with: ECMAScript 6, JQuery, Ember.js, Sails.js, Node, Grunt, faye, Grape, Rabl, Haml, SASS, BEM, HTML5, Redis, Docker, Chef, Capistrano, Bash, Burp, etc.

SUMMARY OF EXPERIENCE:

Over the last 9 years I was working on a various positions and different departments at Ecommerce LLC: 6 of them were in Tech Support(Customer Relation) department and last 3 in IT. Ecommerce is an US company which services the world-wide shared and cloud hosting.

Jun 2015 – Oct 2015	IT department at Ecommerce LLC Position: **Team Lead**	- Worked with the Project Managers to plan, estimate and allocate resources to projects and tasks. Supervised the whole life cycle of 4 projects, starting from initial proposal and requirements gathering finishing execution and release planning. - Mentored and supervised the UI Team of 5 developers in local office and 1 remote developer. - Collaborated with remote team members from Romania, India and the USA, participated in management process. Conducted code reviews and pair programming sessions.
May 2014 – Jun 2015	IT department Position: **Middle developer**	- Found and fixed dozens critical security bugs and flaws in company's legacy code. - Initiated development and implementation of internal JS library for increasing single page applications' bootstrapping speed. - Maintained internal ruby gems.

Ruby/Ruby On Rails, JavaScript/CoffeeScript Full-Stack developer.

		- Increased speed of internal time tracker system by ~5 times applying different caching mechanisms and refactoring legacy code from JS to CoffeeScript.
Sept. 2012 – May 2014	IT department. Position: **Junior developer**	- Collaborated on a team of 4 developers to implement custom Cloud Hosting manage panel integrating CloudStack with existing company's hosting panel. - Was in a team that created hosting panel and billing system for ixwebhosting.com and cloudbyix.com (shared and cloud hosting brands).
Oct. 2006 – Sept. 2012	Various positions in TechSupport , CR department: - **Assistant Technical Manager** **- Supervisor** **- Tech Support Agent**	- Mentored and lead 1-2 new supervisors each year, taught more than 50 tech support agents. - Interacted with ~50 customers each day, improving their experience by fixing their websites and providing technical support. - Volunteered to develop and implement several auto-installers of php-based applications such as Squirrelmail or AWStats, wrote php.ini editor for shared hosting servers, created internal website security and DNS testing tools using bash and Perl. - Rewrote onboarding process for newbies in tech support department. Implemented internal education workflows, policies and wiki system.

SPECIAL KNOWLEDGES

Web Application Security Researcher:
- Created vulnerable applications for 4 CTF security challenges held by «Berezha Security» and NonGovernment Organization «**Ukrainian Information Security Group**».
- Audited and provided feedbacks for more than 20 websites and web-services.

Community development:
- Contributed to open source projects, e.g.: **rack; backbone.js; site_prism.vcr; phony**
- Maintain my own open source projects:
  https://www.npmjs.com/package/**grunt-coffee-chain**
  https://rubygems.org/gems/**asana-god-contact**
- Partnered with 4 other developers to plan and execute 3 Front-End Meetups and the very first Hackathon in Zaporizhzhya city.

Languages: English – upper-intermediate level. Ukrainian, Russian – native.

EDUCATION

Zaporizhzhya National University of Ukraine
> Second cycle of higher education.
> Specialty: Economic Cybernetics;
> Degree: Economist, Mathematician.
